Objective

In this challenge, we learn about conditional statements. Check out the [Tutorial](#) tab for learning materials and an instructional video.

Task

Given an integer, , perform the following conditional actions:

- If is odd, print `Weird`
- If is even and in the inclusive range of to , print `Not Weird`
- If is even and in the inclusive range of to , print `Weird`
- If is even and greater than , print `Not Weird`

Complete the stub code provided in your editor to print whether or not `n` is weird.

Input Format

A single line containing a positive integer, `n`.

Constraints

•

Output Format

Print `Weird` if the number is weird; otherwise, print `Not Weird`.

Sample Input 0

```
3
```

Sample Output 0

```
Weird
```

Sample Input 1

```
24
```

Sample Output 1

Not Weird

Explanation

Sample Case 0:

is odd and odd numbers are weird, so we print `Weird`.

Sample Case 1:

and is even, so it is not weird. Thus, we print `Not Weird`.

Language

Python 3
